**Q2: With reference to the recent study conducted by the Indian Institute of Astrophysics (IIA) on solar magnetic activity, consider the following statements:**

1. The study used Ca-K line spectroscopic data from Kodaikanal Solar Observatory covering an 11-year period.
2. Most solar magnetic activity was found to be concentrated near the poles, especially above 60° latitude.
3. The study captured the transition from solar cycle 24 to solar cycle 25.

**Which of the statements given above is/are correct?**

- A: 1 and 2 only
- B: 1 and 3 only
- C: 2 and 3 only
- D: 1, 2, and 3

**Q3: Why is mapping solar magnetic activity across latitudes scientifically and strategically important for India?**

1. It enhances prediction of solar storms and coronal mass ejections.
2. It contributes to understanding the solar dynamo, which governs magnetic field generation on the Sun.
3. It enables India to plan the timing of satellite launches during periods of low solar activity.
4. It helps improve rainfall forecasting during the Indian monsoon season.

**Select the correct answer using the code below:**

- A: 1 and 2 only
- B: 1,3 and 4 only
- C: 1, 2 and 3 only
- D: 1, 2, 3 and 4

**Q4: In the context of “Digital Arrest Scams” recently highlighted by the Supreme Court, consider the following statements:**

1. Digital arrest scams typically involve impersonation of officials from central agencies and conducting fake interrogations over video calls.
2. The Supreme Court has empowered the CBI to investigate these scams even in states where general consent under the DSPE Act is withdrawn.
3. RBI has been asked to develop AI/ML systems to detect suspicious patterns such as mule accounts and money layering.
4. The Indian Cyber Crime Coordination Centre (I4C) operates under the Ministry of Electronics and IT.

**How many of the above statements are correct?**

- A: Only one
- B: Only two
- C: Only three
- D: All four

Sho

**Q5: With reference to cancer, consider the following statements:**

1. Cancer is primarily a genetic disease caused by uncontrolled cell division.
2. Carcinogens can induce mutations that may lead to cancer.
3. All cancers are hereditary because they result from changes in DNA.
4. Metastasis refers to the spread of cancer cells from the primary site to distant organs.

**How many of the above statements are correct?**

- A: Only one
- B: Only two
- C: Only three
- D: All four
