Q4: With reference to DRDO's Long Range Anti-Ship Hypersonic Missile (LR-AShM) unveiled during the 77th Republic Day Parade (2026), consider the following statements:

- 1. The missile is designed to engage both static and moving sea targets at ranges of about 1,500 km.**
- 2. It follows a quasi-ballistic trajectory and sustains hypersonic speeds while flying at lower altitudes to reduce detectability.**

3. The missile relies on imported avionics and guidance systems due to the complexity of hypersonic technologies.

4. Its two-stage solid propulsion system transitions into an unpowered glide phase with manoeuvrability.

Which of the statements given above are correct?

- A: 1 and 2 only
- B: 1,3 and 4 only
- C: 1, 2 and 4 only
- D: 1, 2, 3 and 4
